

Botswana is considered as a LOW RISK COVID-19 country and being able to operate in secluded campsites in exclusive groups creates a safe environment for all guests and staff. We want to reassure you as a company we are doing all we can. We hope to welcome you soon enough!

Preventive Safari Measures

Semunyeni Masks:

For safety reasons, Semunyeni will provide masks for all clients plus there are branded Semunyeni Buffs available for purchase for alternative facial cover.

Individual Servings:

Rather than serving brunch or high tea as a communal serving, plated meals will be prepared for each person

Secluded Camps:

Being members of BOGA and HATAB mean we have access to excluded campsites therefore reducing contact.

Customized Safari Vehicles:

We have custom designed our vehicles to take no more than 6 people to comply with social distancing

Temperature Checks:

We will screen for elevated temperatures on a daily basis to monitor all staff and guest's safety.

Medical Evac:

We work closely with Okavango Air Rescue - a team of dr. who advise on any medical related issues.

Sanitise All Surfaces:

We have all equipment necessary to sanitise all surfaces around camp for hygiene reasons. There is also medical grade sanitiser available for personal use.

Sanitize

Semunyeni Staff:

The Semunyeni Team will all go through processing to ensure a clean bill of health and will have certification to verify so. We will also meet any demands made by clients for reassurance of complete health.
